Re: Willem [REDACTED]

Dear Mr. Krick:

This letter is further to your inquiry regarding certification in the Electrician trade for [REDACTED]. Based on the information and documentation received, it has been deemed that your client has not met the requirements to challenge the written examination.

Please note Industrial Electrician is **NOT** a designated trade in Saskatchewan; however Electrician "Construction Maintenance" is a compulsory trade and therefore to work in this trade your client must be a registered apprentice or journeyperson.

As your client is an Industrial Electrician (International) certificate holder, he first must receive permanent resident status and register as an apprentice to work in the Electrician trade in Saskatchewan.

If you have further question you may contact me at (306) 787-5996 or at the address listed above.

Yours truly,

Melody Burzminski  
Trades Assessment Consultant
